

# Daily Sexual Health Power Routine

*Your Simple Daily Checklist by Dr. Madhu Sudan*

*Follow this daily. Pick one item from each section to start. Build up over time. Consistency beats intensity.*

---

## MORNING NUTRITION (5 minutes)

- ☐ 5-6 soaked almonds (soak overnight, eat first thing — supports hormone production)
- ☐ 1 glass warm milk with a pinch of ashwagandha and turmeric
- ☐ 1 banana or a handful of dates (natural energy + potassium)
- ☐ 1 spoon desi ghee with breakfast (supports nutrient absorption)

## DAILY MOVEMENT (15-20 minutes)

- ☐ 15-minute brisk walk (morning or evening — improves blood circulation)
- ☐ Kegel exercises: 3 sets of 10 reps (tighten, hold 5 sec, release — do anywhere)
- ☐ 10 bodyweight squats (strengthens pelvic region and lower body blood flow)
- ☐ 5-minute butterfly stretch (sit, soles of feet together, press knees down gently)

## BREATHING & CALM (10 minutes)

- ☐ 5 minutes Kapalbhata pranayama (boosts energy + hormonal balance)
- ☐ 5 minutes deep breathing or 4-7-8 method (reduces cortisol/stress hormone)
- ☐ No phone for 30 minutes before bed (blue light kills melatonin and sleep quality)

## EVENING WIND-DOWN

- ☐ Last meal at least 2 hours before bed (body can't rest and digest at the same time)
- ☐ Warm milk with ashwagandha before sleep (natural sleep and recovery support)
- ☐ 1 honest conversation with your partner this week (connection matters as much as treatment)

---

## WHY THIS WORKS

This routine targets the 5 pillars of sexual health: nutrition (hormone fuel), movement (blood flow), breathing (stress reduction), sleep (recovery), and connection (emotional health). When all 5 work together, results come faster and last longer than any single treatment.

---

**Want to go deeper?** This checklist covers the basics. In the coming days, I will send you detailed guidance on each pillar — specific foods, targeted exercises, stress techniques, and more. Keep reading my emails.
